Project Information Sheet

Project: 819520 Back-up Power for Wells

Category:	Special	Type:	Water	Department:	Public Works
Origination Year:	1997-98	Phase:	Construction	Project Manager:	Hira Raina
Planned Completion Year:	2001-02	% Complete:	85	Project Coordinator:	Jim Craig
Origin:	Staff			Interdependencies:	none
Element:	3 Environmental Management		Goal:	3.1A	
Sub-Element:	3.1 Water Resources		Neighborhood:	City Wide	
Fund:	455 Utilities		Sub-Fund:	100 Water Supply and Distribution	

Statement of Need

This project provides for two portable generators for supplying back up power at various well sites. The trailer-mounted generators could also be used at other well sites on an as-needed basis.

Service Level

The back up power for wells will ensure that current service levels are maintained in case of Hetch-Hetchy failure in an emergency.

Issues

The project construction is on hold pending approval of the permits from the Air Quality Board that the contractor is required to obtain.

Project Information Sheet

Project: 823360 Ultra Low Flow Toilet (ULFT) Rebate Project

Category:	Special	Type:	Water	Department:	Public Works
Origination Year:	2001-02	Phase:	Implementation	Project Manager:	Jim Craig
Planned Completion Year:	2002-03	% Complete:	50	Project Coordinator:	Lisa Kemmer
Origin:	Staff			Interdependencies:	none
Element:	3 Environmental Management		Goal:	3.3D	
Sub-Element:	3.1 Water Resources		Neighborhood:	City Wide	
Fund:	455 Utilities		Sub-Fund:	100 Water Supply and Distribution	

Statement of Need

The Ultra Low Flow Toilets (ULFT) Rebate Project is part of a requirement under the California Urban Water Conservation Council's Best Management Practices (BMP 14) and in accordance with the development of water conservation programs under the City of Sunnyvale's Urban Water Management Plan 2000. The intent of this project is to provide residents of Sunnyvale with a direct rebate for purchasing and installing the new 1.6 gallons per flush toilets to reduce water consumption. Half of the rebate will be funded by this project and the balance will be matched by the Santa Clara Valley Water District's Water Conservation Program. Although this program is not yet mandated by the State it will show the City of Sunnyvale's intentions for promoting real water conservation and open the door for future funding of such programs through grants and low-interest loan programs offered by the Department of Water Resources and the U.S. Bureau of Reclamation.

Project: 823890 Water Infrastructure Vulnerability Security Assessment Plan

Category:	Special	Type:	Water	Department:	Public Works
Origination Year:	2002-03	Phase:	Planning	Project Manager:	Jim Craig
Planned Completion Year:	2002-03	% Complete:	n/a	Project Coordinator:	Lisa Kemmer
Origin:	Staff			Interdependencies:	none
Element:	3 Environmental Management		Goal:	3.1B, 3.1C, & 4.1A	
Sub-Element:	3.1 Water Resources		Neighborhood:	City Wide	
Fund:	455 Utilities		Sub-Fund:	100 Water Supply and Distribution	

Statement of Need

Following the events of September 11, the United States Environmental Protection Agency (USEPA) received a supplemental appropriation from Congress to improve the safety and security of the water supply of the Nation. A grant program was established to assist water utilities in responding to the threat of terrorist attacks and improving the security of water utility infrastructure and operations. Priority activities to be funded by these grants include: (1) Development of a Vulnerability Assessment. This is the highest priority activity under the grant program, since it is the first step in understanding how and where a water utility can be damaged by a terrorist attack. (2) Development of an Emergency Operations Plan to deal with the threats identified in the Vulnerability Assessment. (3) Planning and designing projects to enhance the water utility's system security. The City applied for and was successful in receiving a grant of \$115,000 from USEPA to conduct the Vulnerability Assessment and to update our Emergency Operations Plan. The City is now requesting proposals from qualified consultants to assist the City in the completion of these tasks.

Project Information Sheet

Project: 824280 Leak Detection Program

Category:	Special	Type:	Water	Department:	Public Works
Origination Year:	2003-04	Phase:	Planning	Project Manager:	Jim Craig
Planned Completion Year:	Ongoing	% Complete:	0	Project Coordinator:	Lisa Kemmer
Origin:	Staff			Interdependencies:	Finance
Element:	3 Environmental Management		Goal:	3.1D.1 & 3.1G.4	
Sub-Element:	3.1 Water Resources		Neighborhood:	City Wide	
Fund:	455 Utilities		Sub-Fund:	100 Water Supply and Distribution	

Statement of Need

As recommended by the California Urban Water Conservation Council and as identified in the City's adopted 2000 Urban Water Management Plan as Best Management Practice #3, leak detection and system water audits are to be performed every three years following with an annual prescreening system audit. Any water loss due to leakage, theft, under-billing of customers, faulty control systems, or for any other reason represents revenue losses to the City. Follow up actions when leaks are located may include repairing leaky pipes and valves, replacement of water mains with a history of serious leaks, annual exercising of valves, and a corrosion control procedure (i.e. cathodic protection program). The primary benefit of early leak detection is catching a leak before it becomes a larger problem, resulting in more water lost. Leak repair also keeps leaks from deteriorating into large-scale leaks that can lead to system failures causing emergency conditions and compromising public safety. The City would benefit by decreased costs of large repairs from water main breaks, decreased capital costs for production, transport, storage, treatment, distribution, and wastewater treatment, as well as decreased costs for O & M, energy, chemicals, treatment, and labor (overtime).

Project Information Sheet

Project: 824290 Water Cost of Service Study

Category:	Special	Type:	Water	Department:	Finance
Origination Year:	2003-04	Phase:	Ongoing	Project Manager:	Tim Kirby
Planned Completion Year:	2004-05	% Complete:	n/a	Project Coordinator:	Jim Craig
Origin:	Staff			Interdependencies:	Public Works
Element:	3 Environmental Management		Goal:	3.1E	
Sub-Element:	3.1 Water Resources		Neighborhood:	City Wide	
Fund:	455 Utilities		Sub-Fund:	100 Water Supply and Distribution	

Statement of Need

Every five years the Utilities Division in the Dept of Finance intends to perform a cost of service study on the water system to reallocate the costs of the City's water services among the various customer classes based on their use of each service. Staff will work with a consultant to develop a cost of service model and populate the model with current data. The study generates a cost of service for each customer class and recommends adjustments to the rate structure to ensure costs are recovered on an equitable basis from the different customer classes. This type of study has not been performed for the water system in many years. The initial project cost will be high, with future years being lower as a contractor will be able to work with an existing model.
